

# YOU are not small !

From Asia to Oceania Maharaji continues meeting locals - latest in another intimate Australian event in the centre in Amaroo

WWNWP report by  
Margaret Berman  
And Jan Buchalter

[as recalled in notes  
- due to transcripts  
not available]

... in the outskirts of Space on Earth the Ivory Rock is a mighty sight in front of the Milky Way on a bright starry night in Amaroo

## Maharaji's words as recalled by WWNP reporters:

'In Australia sometimes on the land, the Milky Way is very visible at night. Looking at this vastness one could feel very insignificant; all those questions come rolling in, for how small you are in comparison to these galaxies.

I mean even the Earth itself is tucked away in some small corner of space, way outside the milky way, and billions of stars, billions of galaxies.

You, though, are not small. No, no, - you are a part of this creation, and to feel the power of this, to feel how connected you are to all of life, that that light is not bound by form, but suffuses throughout, connecting to the energy that is at the heart of all existence.

Come back to that experience where your heart is touched, where you are full, where you remember the preciousness of your life, and the gift of this love that is within us. Such is the most basic appreciation that can be felt within oneself.

Your light does not have to be this big lighthouse, or the power of these lights that are so intensely bright they hurt your eyes.

It can be just enough, just bright enough that it keeps your way lit, so that you may see where you are.'

The beautiful grounds at Amaroo, known around Brisbane as the **Ivory Rock Conference Center**, was the host site for this second event on the Australian tour.

The lawns and trees are beautifully green at this time, spring in flower, Lotus's blooming on the small pond, the lake full, still and clear. The recent rains have made everything flourish on these 2000 acres of property.

The Amphitheater held about 1000 Australians who had received Knowledge, and Maharaji obviously enjoyed this chance to talk to both new and 'old' people and tell them about the traps in explanations:

*'Philosophers are into explanations, institutions completely built upon this, and thus the simple has become so convoluted.*

*Like...how you would like this statement said to you?: There is a bee on your cheek! ... or: there is something yellow hovering in the vicinity of your corporal body... well, what is yellow, and - come, let us discuss this, sit down and I will elucidate upon these very matters...*

*By the time this is going on, your cheek will be swollen three times its size, because the bee has stung you.*

*Knowing this aspect of oneself, this beautiful soul that does not age, this strength that only gets more firmly founded within oneself, this Knowing that sails one through all the problems is who we are, and it is illuminating, to be settled in this experience.*

*Pain can lower your resistance, and your clarity is usually the first to go out the window, the questions come tumbling in, the doubt, the fear, what's going to happen to me, etc. So don't blow out the little lamp that lights your way out of the darkness. Keep that safeguarded, for that light will guard you against not being able to see your way through.*

*Some people are so used to blowing out their birthday candles, that they start blowing out the lamp of Knowledge. Don't do that, for there are so many influences that want to extinguish that light.*

*Remember Know Thy Self. Hear that voice.*

*Relatives, friends, associates all are having their say, but you must be firm in your conviction.*

*We fight the wrong things. We need to fight to safeguard our knowing, our commitment to that clarity, our firm resolve to find our peace within and to honor your own beauty and worth and commitment.'*

He mentioned that couples that expect things from each other will never work. You need two strong complete human beings and then that support can manifest. The attraction of that will magnetize a partner to you, if that is what you wish, but first you must stand solidly on your own two feet.

*'So trust your own visions, regardless of the nay sayers, or the ones who ridicule.*

*Visionaries see what is ahead, and they must forge on, being courageous enough to follow through and see it manifest into reality.'*

## Start from scratch

### Highlights in expressions:

During expressions Maharaji made it clear that real change is happening in the work to get his message out. Prompted by another question, he moved to talk about propagation and the organisation. Memorably, he said that 'fear is not a friend of propagation.' We need enthusiasm, courage and lack of fear, and that fundamentally things have to change.

In response to a question about the slow take-up of the SAM programme, he responded that SAM was not taking off as it was not yet loaded – that it needs the communities to get excited.

WOPG will start as a ½ hour show on cable TV & grow – to eventually 24 hours: will be high definition, surround sound, the quality will be spectacular, so that the channels will want it and will pay us for it. He is working on a huge campaign message with billboards: "Have you felt your heart today" – the look is a particular way so that from LA to Tokyo it can be recognised as WOPG.

It was a revelation when he considered there was a possibility to start from scratch again. He remembered when he first came to England, we had to borrow a car, the resources were very thin, and he was living in borrowed houses. Compared to now, we have resources but we don't use them enough. So much more can happen!

He mentioned that he sees enthusiasm and excitement in the young people – they are right with him – but right now there is no place for them to come through – it is grid-locked. *'When you (i.e. the oldie veterans) hear 'young' - don't be afraid: the young people are not caught up in control or stupid bureaucracy – they are only caught up in the vision, and it's a love affair. And they will let you (i.e. oldies) in too.*

*Now it's time for a whole new day - to start from scratch. At first I wondered: Is it possible? Should I? What would it mean? And the more I thought about it, the more excited I became, it goes against every trend – we need to work as a team – are you part of the team?*

*Transparency will be paramount: you can trace your contribution: WOPG is now incorporated and set up, SAMs are in place and there will be wonderful opportunities.*

*Be conscious, and hang on to clarity in joy and adoration and then everything is great. Watch it. In times of plenty, that is the time to think of drought – preparation has to happen in the time of clarity.'*
